Oral Liquid

CS GUARD 20®

Gut Protector

DESCRIPTION :

CS Guard 20 is a nutritional oral liquid formulated with highly absorbable chelated copper for effective supplementation through drinking water. It is primarily used to prevent and correct copper deficiencies while supporting overall animal health and performance. Copper is an essential trace mineral that plays a key role in various enzymatic functions, immune response, and metabolic processes. Regular use of CS Guard 20 helps to strengthen natural defenses, improve feed efficiency, support healthy growth and enhance productivity.

INDICATIONS

- To remove aflatoxin in the gizzard of the birds from koilin layer
- To stop Reduction (from Oxidation Reduction Process) due to poor ventilation and chock lungs and to stop water belly
- Maintains pH of gut if it moves above the normal range

BENEFITS

- Supports bone strength and eggshell quality
- Improves Growth rates and Feed Conversion Ratio (FCR)
- Maintains optimum copper level in birds
- Prevents anaemia, pale combs and poor feathering
- Acts as natural microbial in water and gut
- Enhances immunity and disease resistance
- It stimulates growth in young birds
